## >> Cast Iron Cauldron with legs

The cauldron is made of high quality cast iron in Poland, carefully finished, and fired at high temperature, which affects its resistance and climatic factors.

Cast iron heats up quickly, ensuring an even temperature distribution, so you can prepare tasty and hot dishes in a short time, which will be both soft and crispy.

To protect the cauldron's inside, grease it with oil, which after the first burn creates a protective layer. The kettles are not additionally painted from the inside.
